Environmental Protection Agency  
announces a

### FINAL CLEANUP DECISION

for the

#### Master Metals Superfund Site, Cleveland, Ohio

U.S. EPA has signed an Action Memorandum documenting U.S. EPA's cleanup decision for lead-contaminated soil. The cleanup plan includes excavation, consolidation, and possible treatment of lead-contaminated soil. Contaminated soils will be capped with a thick plastic barrier and a layer of clay and clean soil. Heavily deteriorated portions of the site will be sealed with asphalt concrete or a sealer. The cleanup plan will include provisions to ensure that the cap is monitored and maintained over time. To review the cleanup plan, visit the Jefferson Branch of the Cleveland Public Library at 850 Jefferson Ave. For additional information, contact Bri Bill, U.S. EPA Community Involvement Coordinator, at (312) 353-6646.
